Gecko: Dots Together

wondermaths.app

LOOK · JOIN · MATCH

Read with Gecko and Aro by the river. Look at the two little groups, then find their matching whole.

1 BY THE RIVER
By the river, warm and bright,
Gecko finds a leafy sight.
Aro settles on his tree.
“Let’s look close. What can we see?”

2 ONE AND TWO
One dot here, and two dots there,
on two leaves in river air.
See the single. See the pair.
Little groups for us to share.

3 LOOK AT BOTH
Look at one, then look at two.
Keep both little groups in view.
One alone; a pair nearby.
Picture both, and give it a try.

4 SLIDE AND CHECK
Gecko picks a leaf to try,
three blue dots beneath the sky.
Slide it down and check our guess.
Do both groups match three? Oh, yes!

5 THREE TOGETHER
One and two make three in all.
Aro gives a happy call.
“Three below matches both above.
That’s the leafy match we love!”

Point to the parts, then the whole you see.
One and two together make three.

ARO’S LITTLE THOUGHT

The bottom leaf shows how many dots the two top leaves make together.

Look at both.
Join the groups.
Match the whole.
