Four, a Different Way

wondermaths.app

LOOK · COUNT · TRY ANOTHER WAY

A count-along rhyme for Capuchin: Finger Numbers. Look at the raised fingers and count with Capuchin.

1

BY THE RIVER

By the river, warm and bright,
Capuchin smiles with pure delight.
Hold your two hands where you can see;
Let's try a finger rhyme with me.

2

THREE AND ONE

Three stand up on one small hand.
One stands up to join the band.
Folded fingers rest below;
Raised ones tell us what to show.

3

COUNT THEM

Touch each raised one, nice and slow.
Count them once before you go.
One, two, three, and then one more—
Three and one together make four.

4

FOLD AND LIFT

Fold one down; lift one that's new.
Keep the total plain to view.
Different fingers greet the sun;
Count again when you are done.

5

FOUR

Four still stand beside the stream.
Different fingers, same small team.
Tap the check, then smile and say,
'Four can look a different way.'

Pick new fingers, count once more;
Find another way for four.

ORI'S THOUGHT

You can change which fingers are up and keep the same amount. Count to check.

Ori says

Look. Count. Try another way.
