For Grown-Ups: Answers & Little Hints

Capuchin: Finger Numbers | Worksheet set v1.0.0

No need to print this page. Use it to check an answer or help your child get started. Pointing or speaking is fine when writing is not the goal.

Little hints come before the answer.

L1 / AGE 2.5-3

Hint: Touch each finger that is up once. Which dots match?
Answer: Middle box: two dots.

L2 / AGE 4

Hint: Count the raised fingers on one hand, then keep counting on the other.
Answer: Middle box: five dots. Two and three make five; folded fingers do not count.

L3 / AGE 5

Hint: Touch the raised fingers in each picture. Does moving them to two hands change the amount?
Answer: Middle pair: two fingers on each hand, four altogether. The left pair shows three; the right pair shows five.

L4 / AGES 6-7

Task 1 - Hint: Count all the raised fingers, keeping both hands together.
Task 1 - Answer: 7 (middle box).
Task 2 - Hint: Find the fingers that are still folded. What happens if you open them?
Task 2 - Answer: 3 (middle box); 7 + 3 = 10. Counting each finger or counting on are both valid.

> Zero: When every finger is folded, there are zero fingers UP. Fingers have not disappeared. Let your child point to the illustrated hands rather than copy a gesture if hand movement is difficult.
