Giraffe: Turn the Number

Picture guide

Two parcels. Match each whole label to its load.

AGES 5-7

Actual v3 activity

Look inside both parcels

Long rods are tens. Small cubes are ones.

The loads stay in place while the labels move.

A rod holds ten

Count exactly ten segments in each ten rod.

The separate coral cubes are ones.

Give each parcel a label

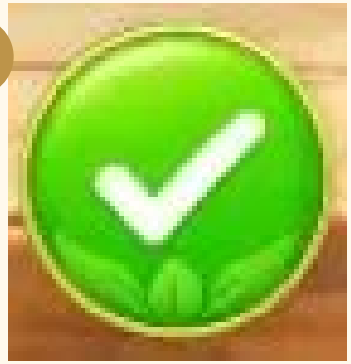
Drag a whole label, or select it and tap a parcel.

The third gesture is the separate OK check.

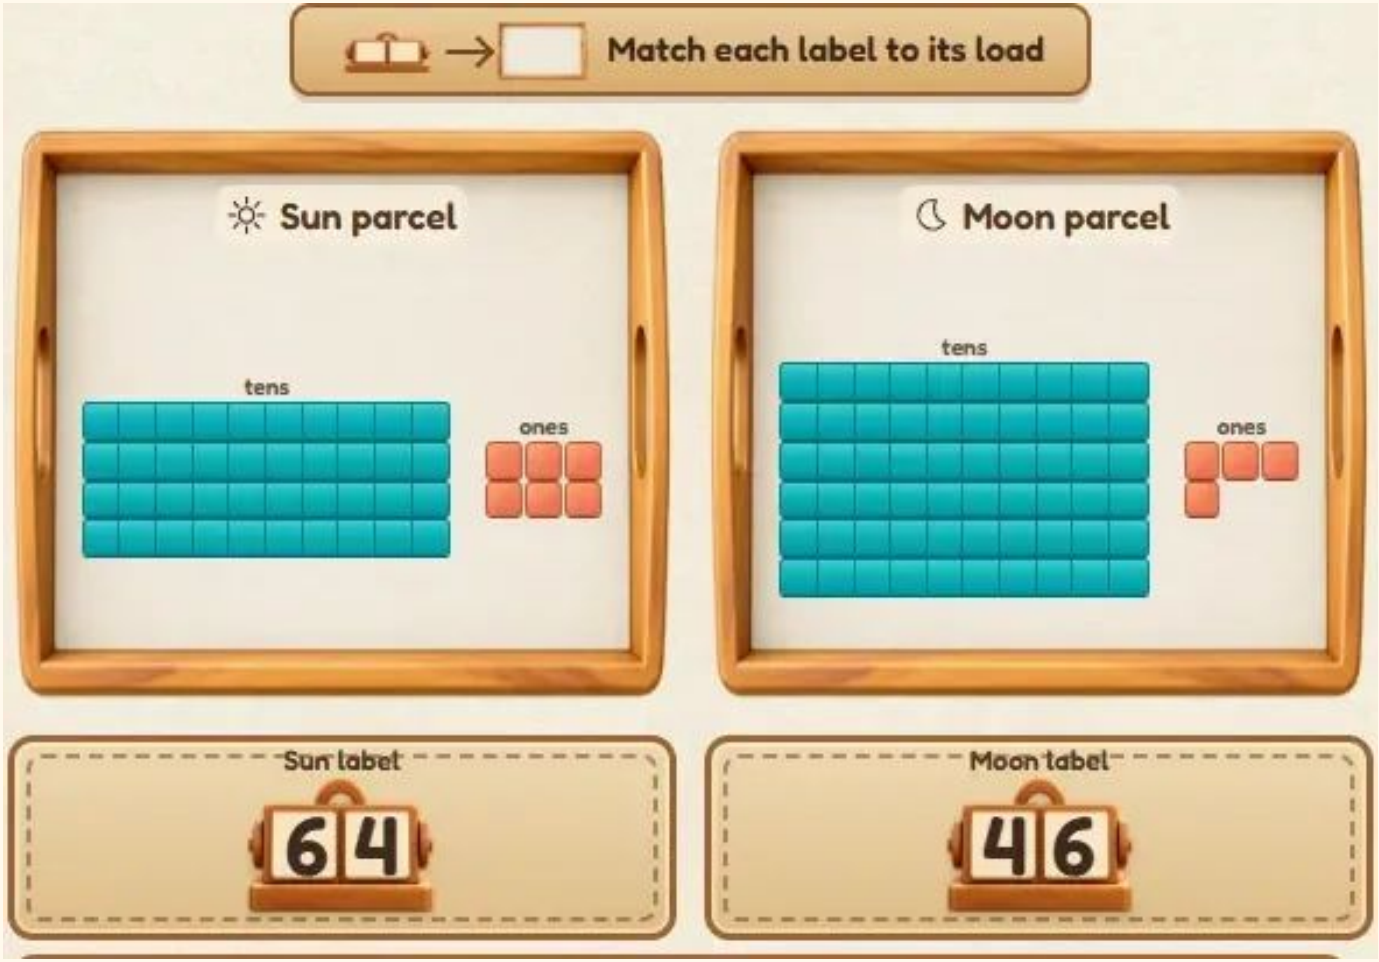
1

2

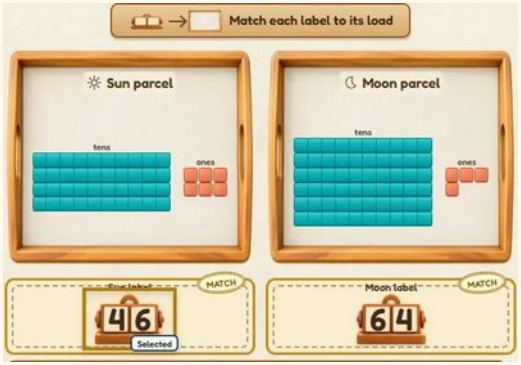
3



Swap two whole labels



Before the swap

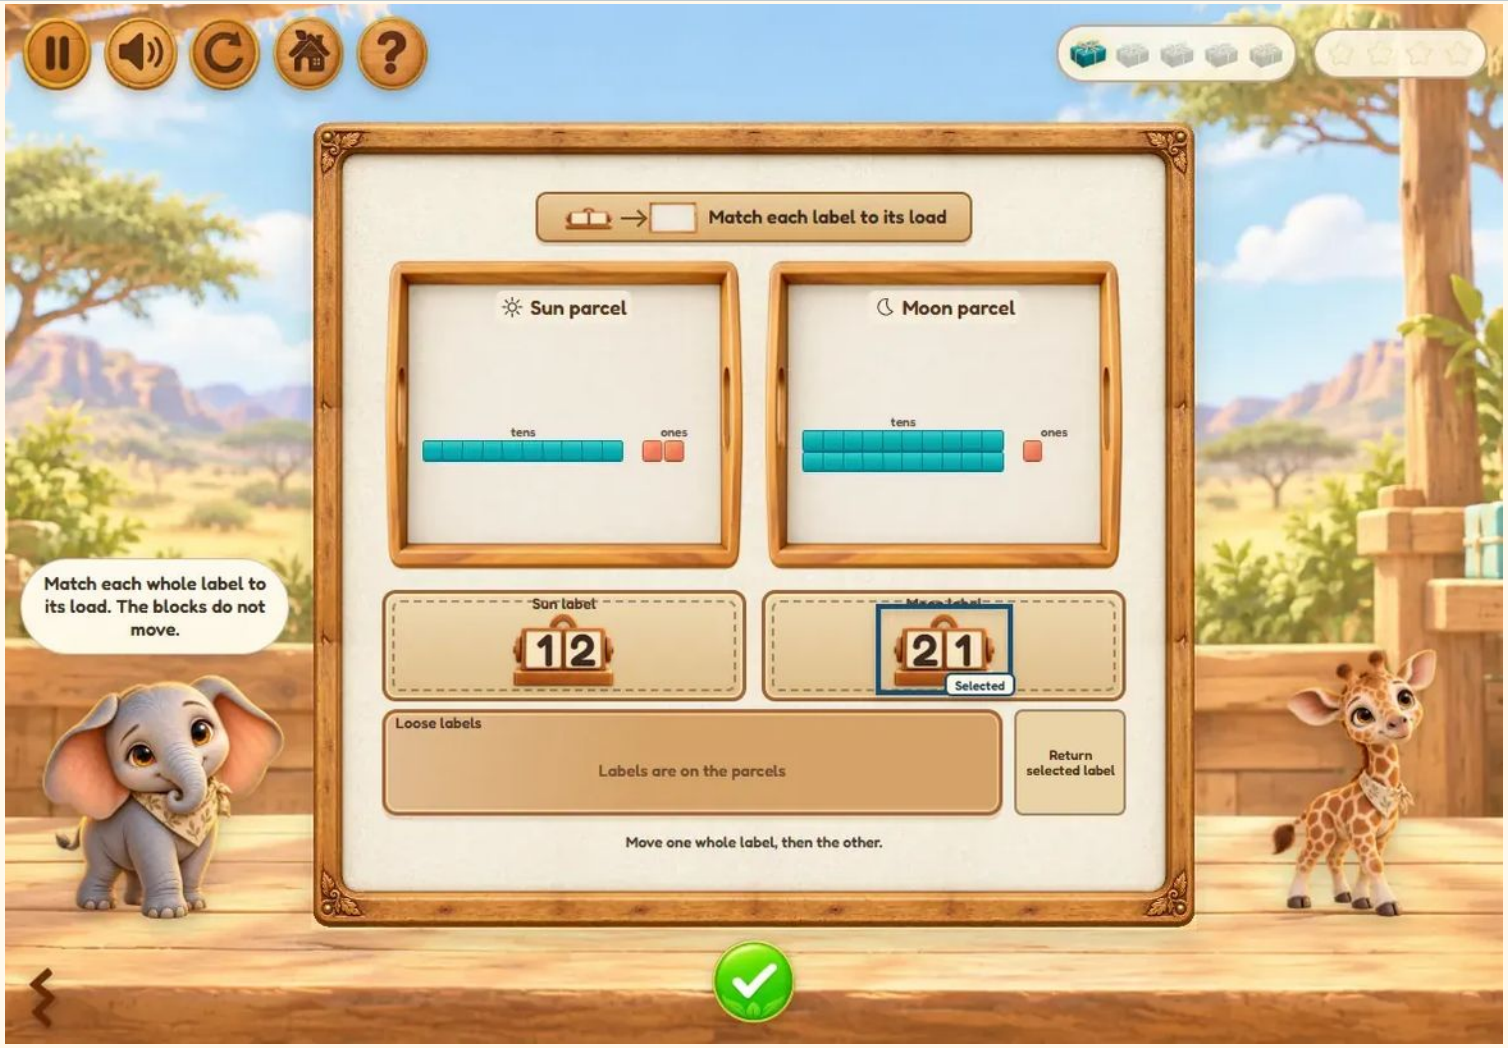


After the swap

Move label 46 onto the other parcel to swap it with 64.

Level 2, task 1: both load pictures stay fixed before and after.

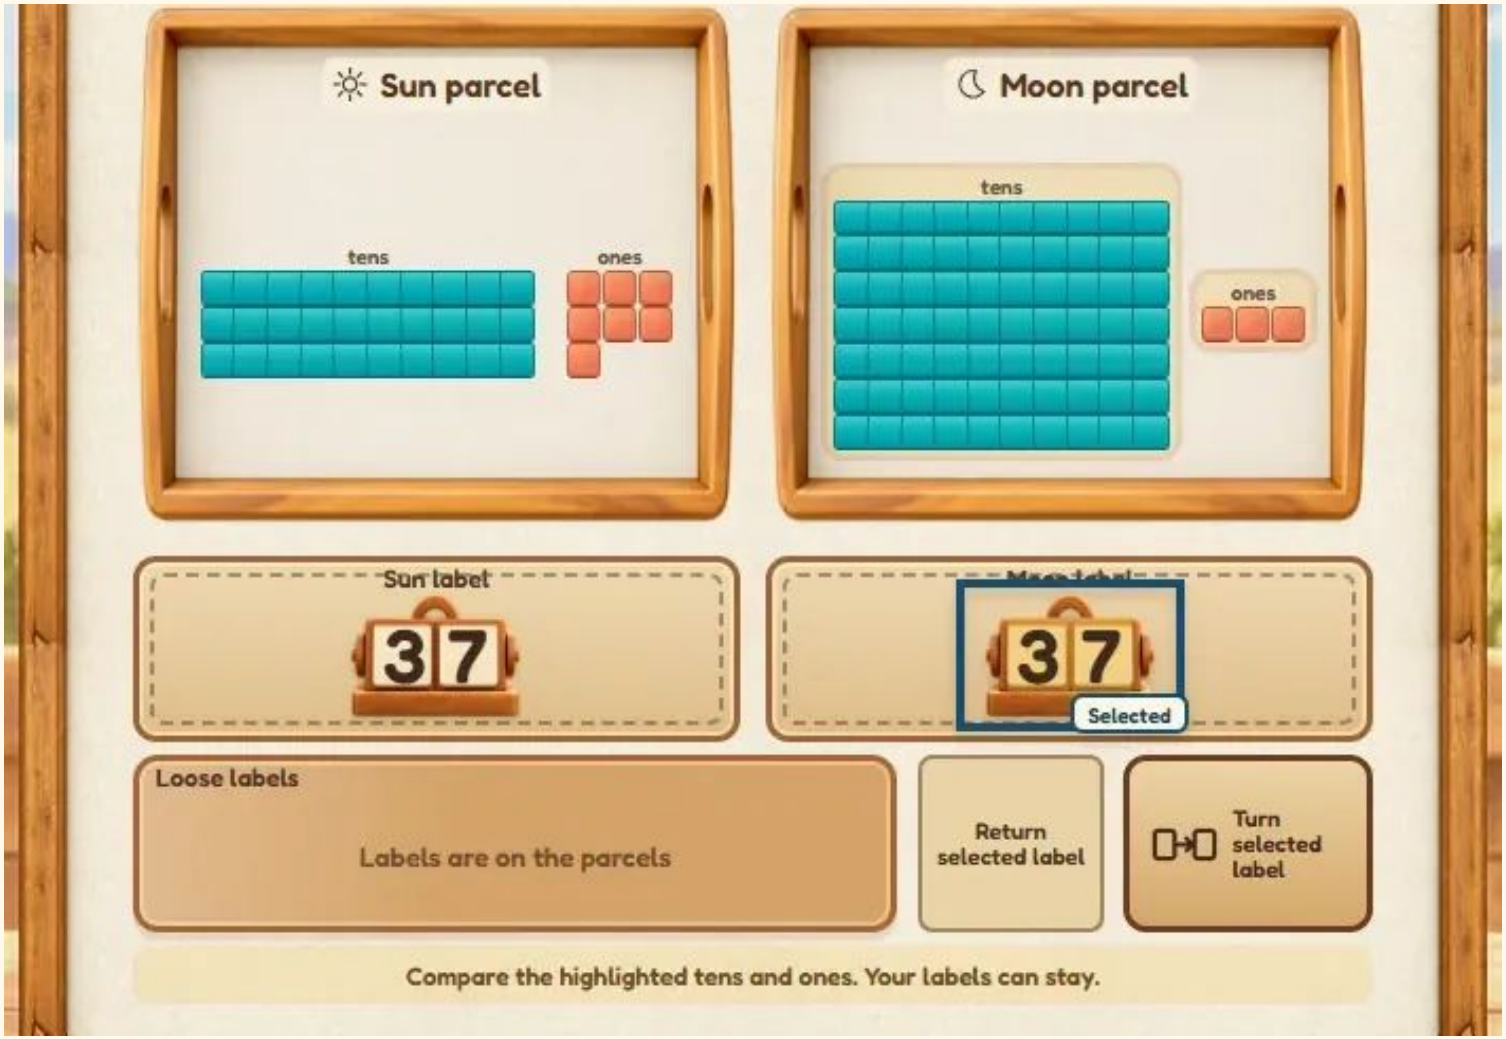
Then press OK



Check both parcels with the separate green OK.

A mismatch keeps every label where you put it.

Something does not match?



Look at the highlighted tens or ones.

Your try stays. Choose another whole label, or repair its print.

Later: turn the print

Label before

Print turned only

Select a label, then use Turn selected label.

37 becomes 73 on the label. Neither load changes.

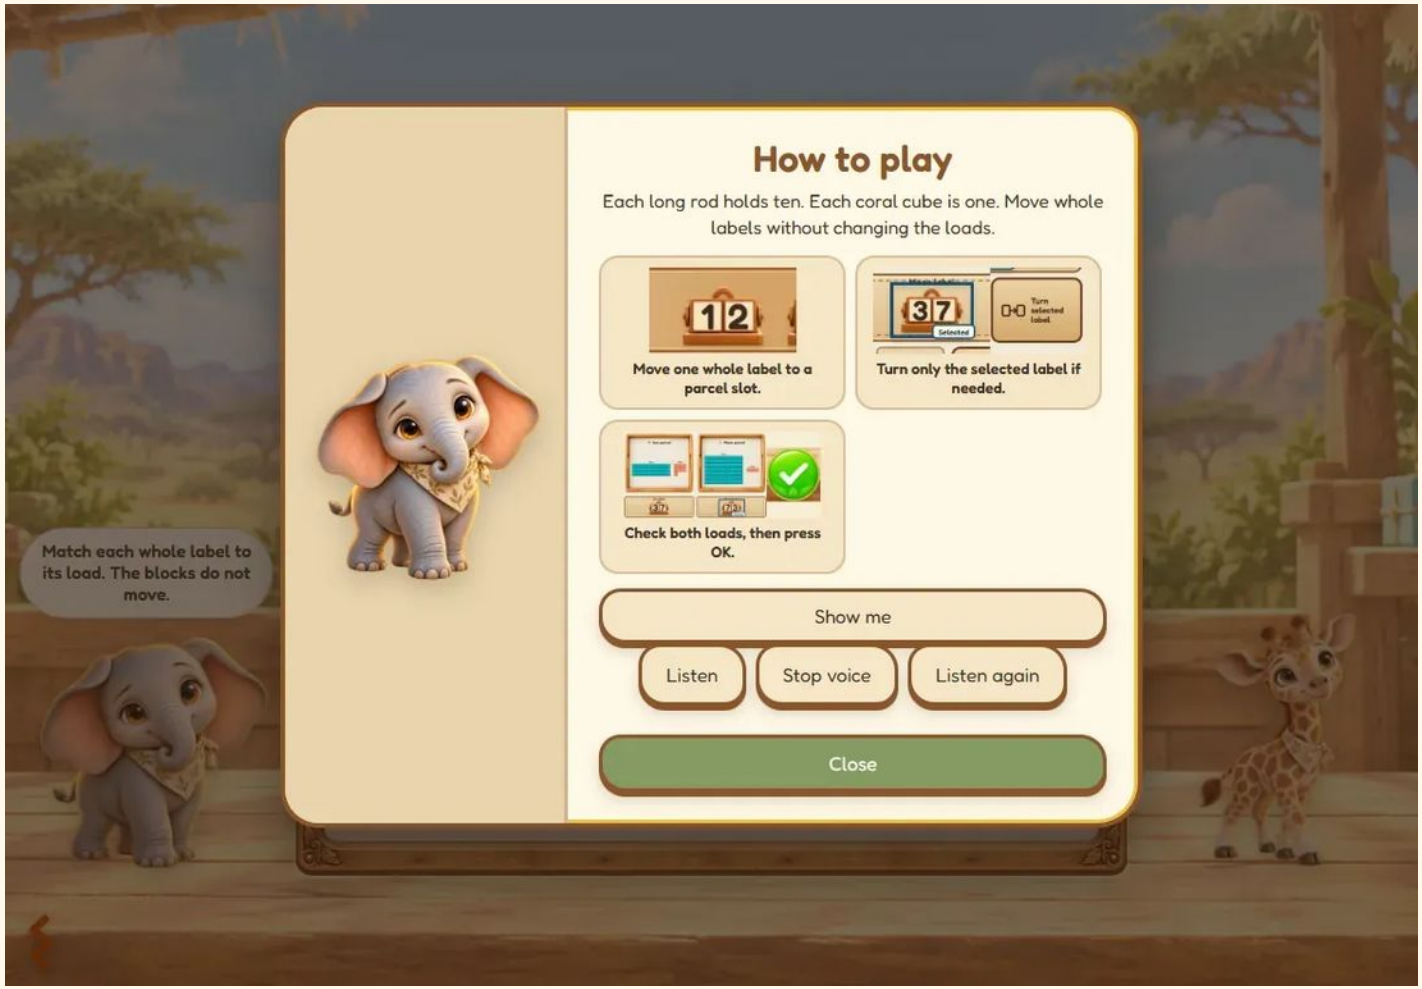
Keep a good match

4 checked pairs

Keep a label that already matches its load.

Four checked pairs complete a level.

Help is close



Pause to rest. Open ? for the guide or Show me.

A demonstration uses other parcels and gives no stars.
