Aro's River Picnic

wondermaths.app

COUNT · COMPARE · CHOOSE

A rhyme for Aro: Which Basket? Look at Aro's two fruits, then find a whole basket with more.

1 BY THE RIVER

Beside the river, warm and bright,
two baskets catch the morning light.
Aro's friend leans close to see:
which has more? Come count with me.

2 TWO AND THREE

Aro's basket holds just two.
Count each fruit: one, two will do.
His friend's has three: one, two, three.
Touch each fruit once. Count with me.

3 COUNT AND COMPARE

Point to one, then point to two;
match those counts in baskets, too.
One extra fruit is plain to see:
two is fewer than three.

4 CHOOSE IT WHOLE

Choose the basket holding three;
keep its fruit inside, you see.
Take it whole: your choice is clear.
One more fruit is waiting here.

5 CHECK YOUR CHOICE

Tap the green check when you're through.
Three is more than Aro's two.
Two have partners; one has none.
More means extra. Nicely done.

**Point, count, choose, then tap to show:
three has more. Now off we go!**

ORI'S COUNTING THOUGHT

Match one fruit with one. An extra fruit shows which basket has more.

Try Aro: Which Basket?

Count. Choose. Check.

A read-aloud rhyme · Ages 4–6
