

A quick guide for parents and caregivers

Aro: Which Basket?

Ages 4-6

The goal: choose more fruit, fewer fruit, or the same number as Aro. | **Playful practice, not a test.**

5 ways to help without giving the answer

1. **Find the sample.**
   Look at Aro's basket before the choices.
2. **Hear the request.**
   Replay: more, fewer, or the same.
3. **Check whole fruits.**
   Touch each fruit once or match fruits in pairs.
4. **Let your child choose.**
   Pick a basket, then press the green check.
5. **Welcome another try.**
   Ask: What could you change about your choice?

Your tiny play plan

5 minutes is plenty

- No timer
- No penalties
- Try again

Let your child decide. Stay curious.

5 signs the math is happening

1. **Uses Aro's sample.**
   They compare with Aro; every fitting basket can work.
2. **Tracks each fruit.**
   They point or count without double-counting.
3. **Notices extras.**
   Pairs help show more, fewer, or equal.
4. **Includes an empty basket.**
   They see that no fruit means zero.
5. **Looks beyond size.**
   They compare number across kinds or spacing.

Try it away from the screen today

Set the sample.
Put 3 spoons in a row.

→

Make choices.
Lay out 2, 3, and 4 spoons.

→

Pick and check.
Ask for more, fewer, or the same.
