Capybara Finds a Place

Capybara: A Place in Line

wondermaths.app

First · Second · Third

A little place is waiting by the riverboat. Read along, then point from the boat to find Capybara's place.

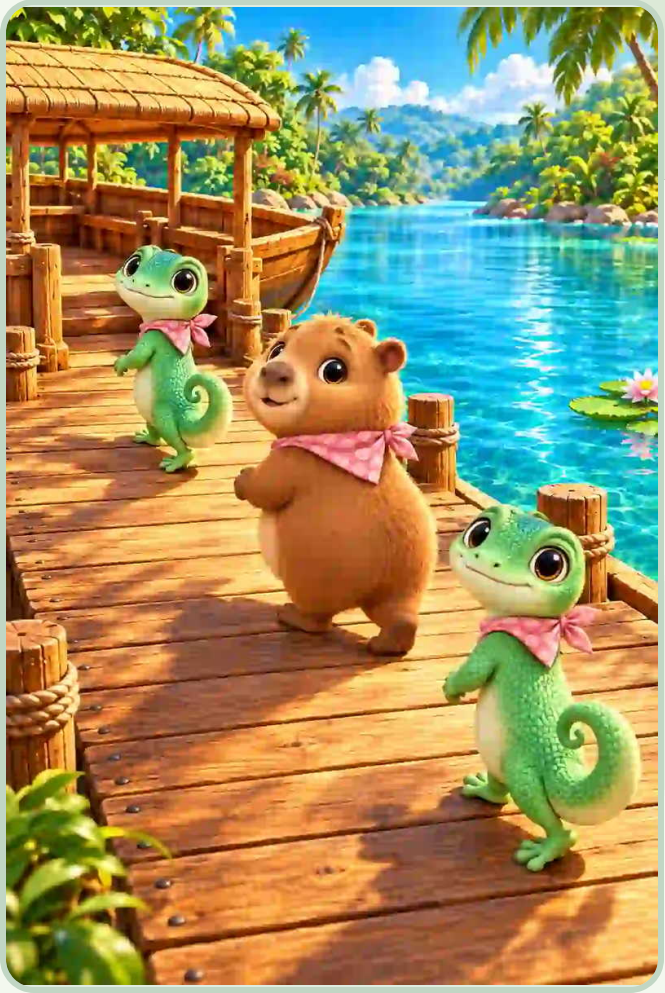

1 Beside the boat, the warm winds blow.
The river sparkles down below.
Capybara comes to see:
“Is there a little place for me?”

2 Two green geckos wait in line;
their leafy scarves are pink and fine.
One stands close beside the boat.
One waits back, where lilies float.

3 “Second,” Aro calls. “Go slow.
Where should Capybara go?”
Find the boat, then start right there;
point along the line with care.

4 The geckos leave a space to spare;
Capybara steps in there.
One friend waits ahead in line;
one stands back. “This place is mine!”

5 First, a gecko leads the way.
Second, Capybara. Here to stay!
Third, a gecko waits behind.
Count from the boat. What place did you find?

Point from the boat and count with me.
Our friend's in second. Now we see!

ORI'S THOUGHT

A place tells where you are in line. Choose the front, then count from there.

Aro says

Find the boat.
Count the places.
Find your place.
