Three Knocks at the Dock

wondermaths.app

LISTEN · COUNT · MATCH

Listen with Capybara beside the Amazon River. Match three knocks to the raft carrying three friends.

1 BY THE RIVER

Two rafts come drifting into view,
on river water, bright and blue.
Our Capybara hears a sound
and turns her little ears around.

2 THREE KNOCKS

Three knocks go tap, tap, tap today.
Three little marks show what they say.
One friend rides here; three ride there.
Which raft has three? Look with care.

3 COUNT THE FRIENDS

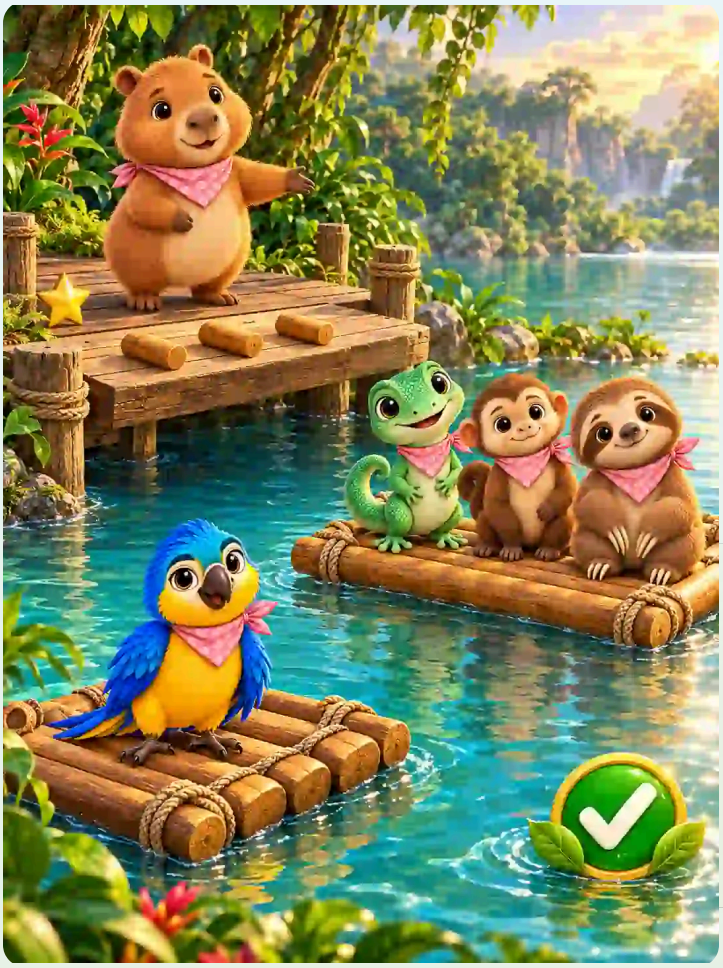

Count each raft's friends, nice and slow:
one here; one, two, three in a row.
Three friends match the knocks we heard.
"Three!" we say. That's the word.

4 CHOOSE THE RAFT

Tap the raft that carries three;
it glides up close for us to see.
The friends stay put; the raft moves slow.
Up to the dock we watch it go.

5 A MATCH

Now tap the check, the bright green one.
Three match three. The task is done.
A little star shines warm and bright;
the number matches. That's just right.

Point to each friend: one, two, three.
The matching raft is plain to see.

ARO'S COUNTING THOUGHT

Count the friends on each raft. Choose the same number as the knocks.
