Capuchin: Two Hands, One Number

wondermaths.app

FIND THE MISSING PART Two fingers are showing. Help Capuchin choose the other hand to make five.

1

BY THE RIVER

By the river, in the sun,
Capuchin starts some finger fun.
Aro says, "We need five here.
Let's find the part and make it clear."

2

TWO AND THREE

Two stand tall on this hand here.
Three wait on a card quite near.
Keep the two and look for three.
Will they make our five? Let's see.

3

COUNT THE PAIR

Touch each raised tip as you go.
One, two, three, four, five - nice and slow.
Five is more than two alone.
Now the missing part is known.

4

CHOOSE AND SLIDE

Choose the hand that shows us three.
Slide it next to two - you'll see.
Tap OK. Now take a peek:
Five is just the whole we seek.

5

FIVE TOGETHER

Two and three make five today.
We found the part - hip, hip, hooray!
Aro smiles; our friend feels proud.
Say, "Two and three make five!" out loud.

Point to two, then point to three.
Five altogether - count with me!

ARO'S THOUGHT

Two parts can look different and still make the whole we need.

Try a finger adventure

Look at two.
Choose three.
Make five.
