Rhino: Ten Steps Further

A calm five-minute guide

Goal: move whole tens while the loose ones stay.

Help without taking over

1. Let the separate demonstration finish.
2. Point to the start and delivery goal.
3. Let your child choose the next stop.
4. After a mismatch, compare lengths.
5. Leave the stop for your child to repair.

5 min

1. One short try.
2. No hurry.
3. Pause any time.

Things to notice

1. The start is not a step.
2. One full bundle moves per ten.
3. The loose ones remain.
4. Every step is checked.
5. The child repairs a first idea.

Away from the screen

1. Tie ten sticks into a bundle. 2. Keep three loose sticks in a pocket. 3. Add or put away a whole bundle. Notice what stayed.
