Gecko: Collection Signs

A picture guide

Look. Move. Check.

Tap the sign. Tap the tray. Tap the check.

Meet Gecko and Macaw

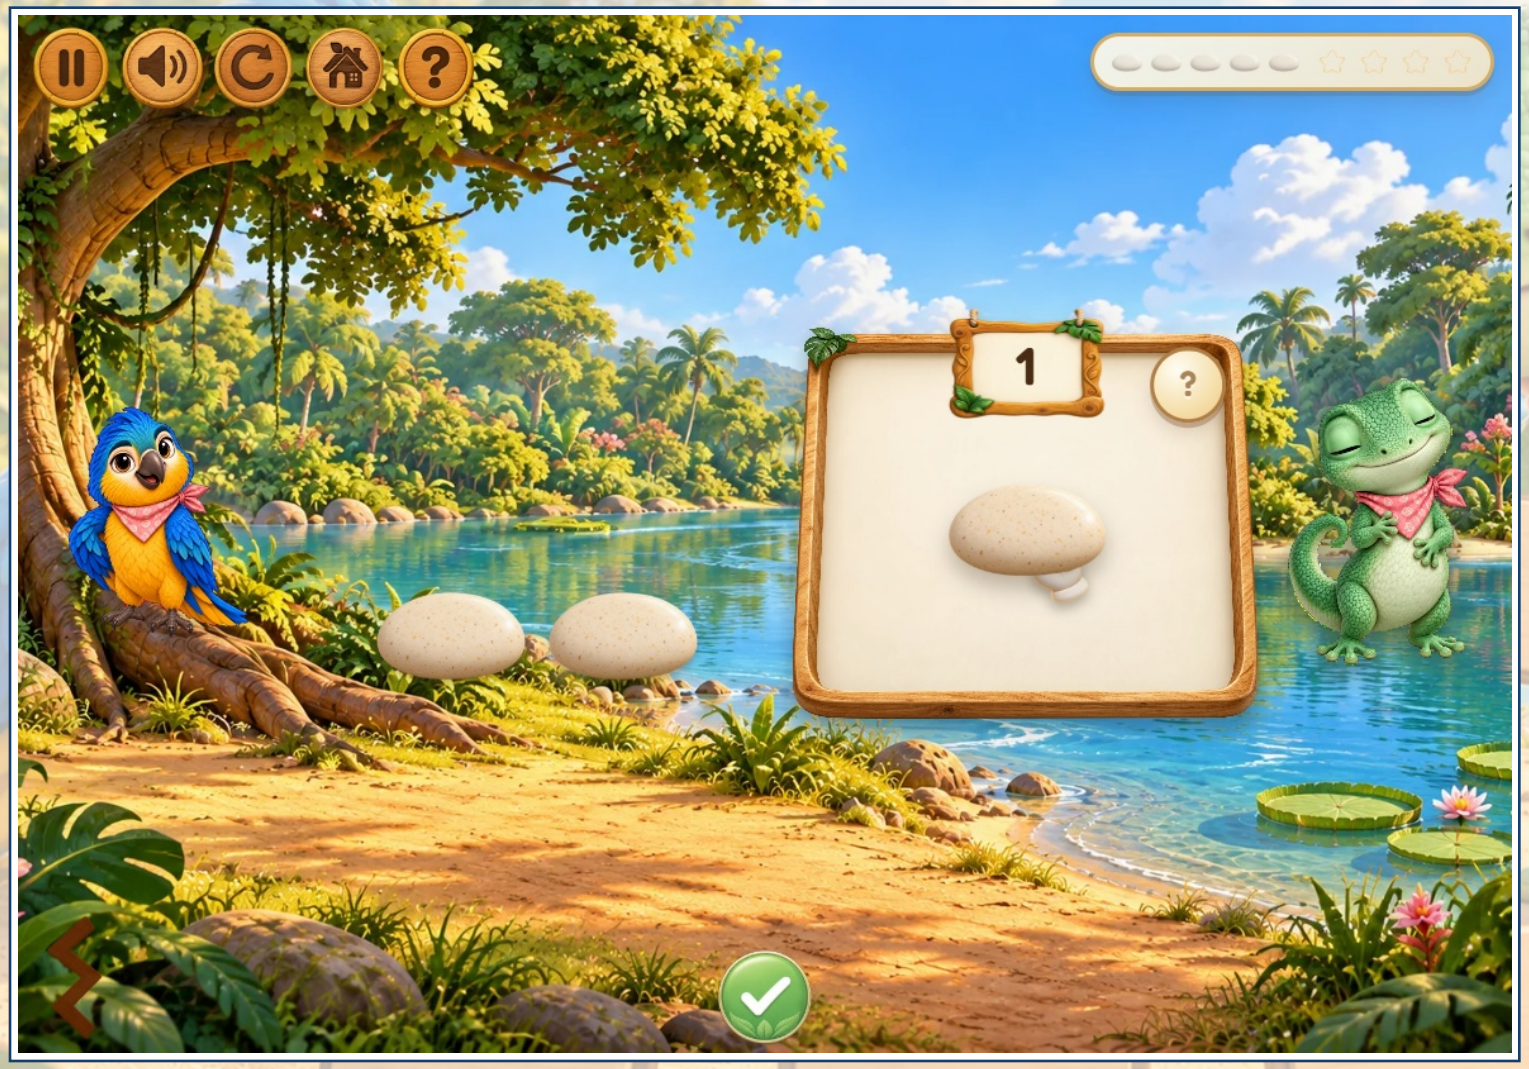

We make collections by the river.

Watch the hand

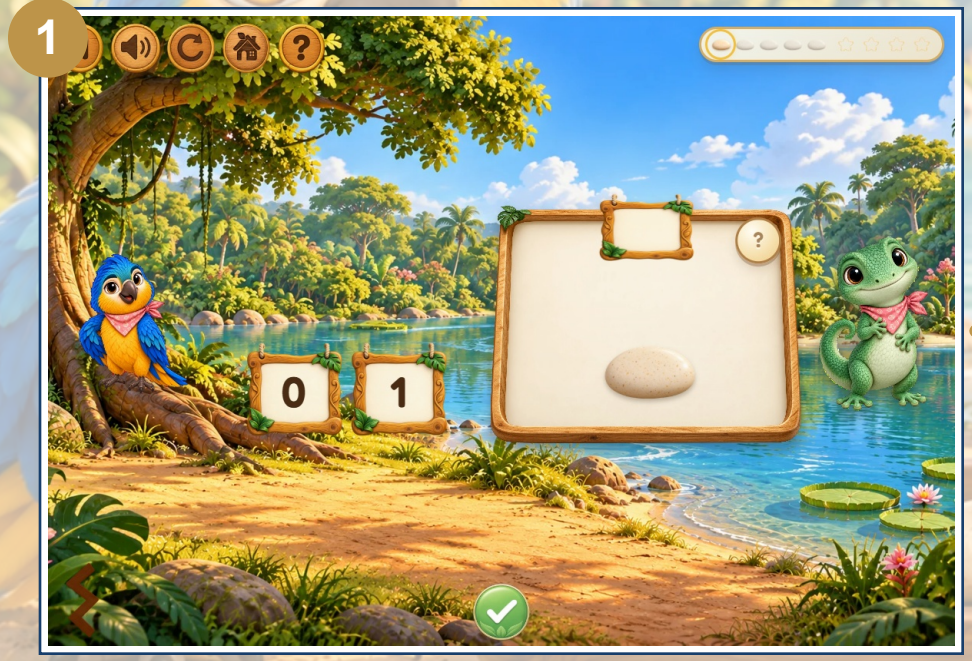

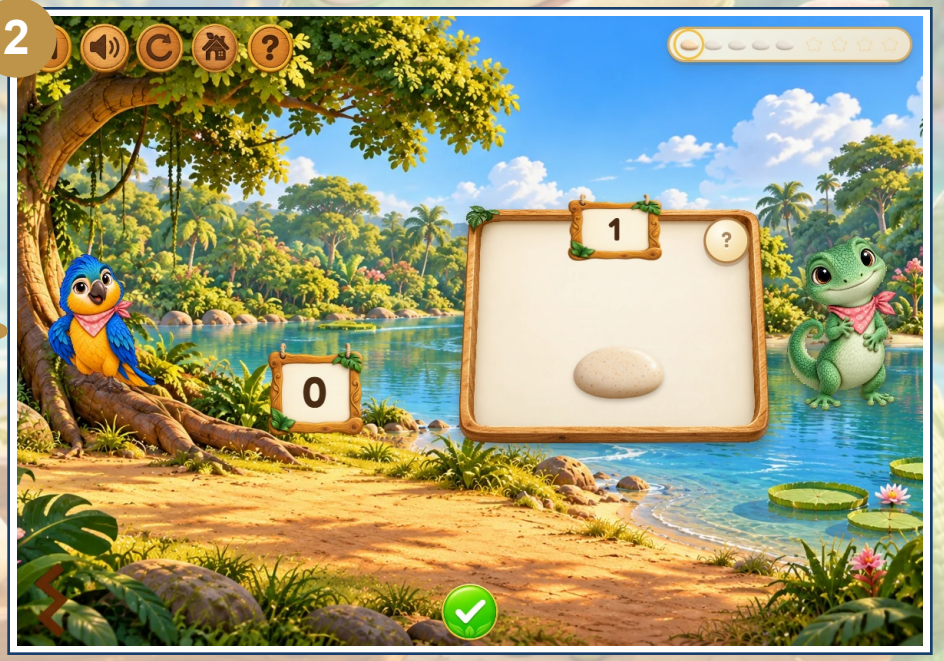

First, watch where the finger points. Then it is your turn.

Show your child the pointing hand, then let them try the same move.

Choose a sign

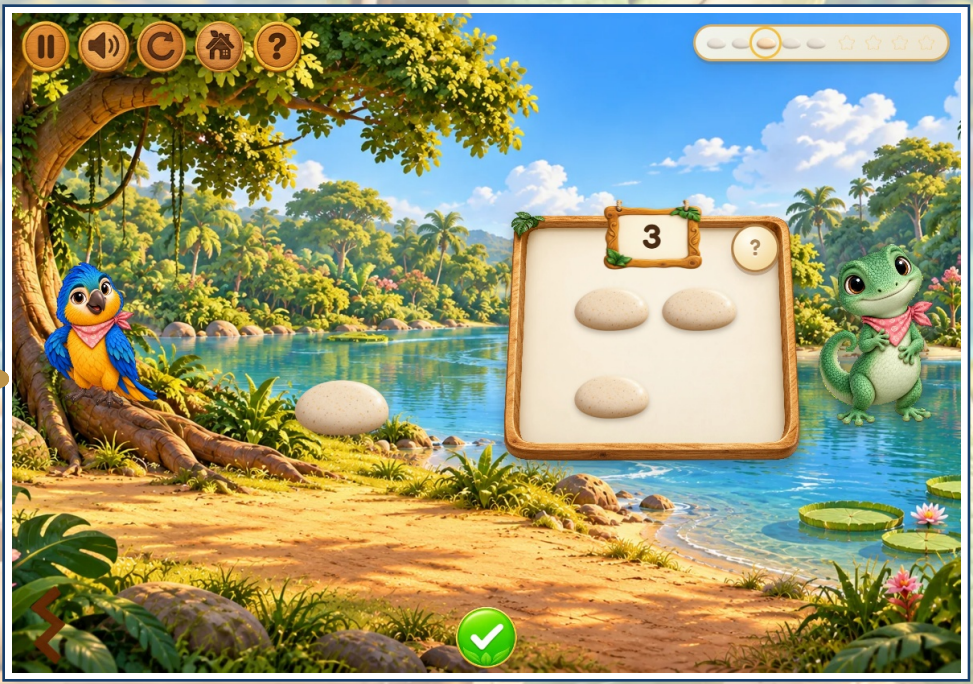

Count the stones on the tray. Tap a matching number, then tap the tray.

The number sits on the tray label once it is chosen.

Make a collection

before

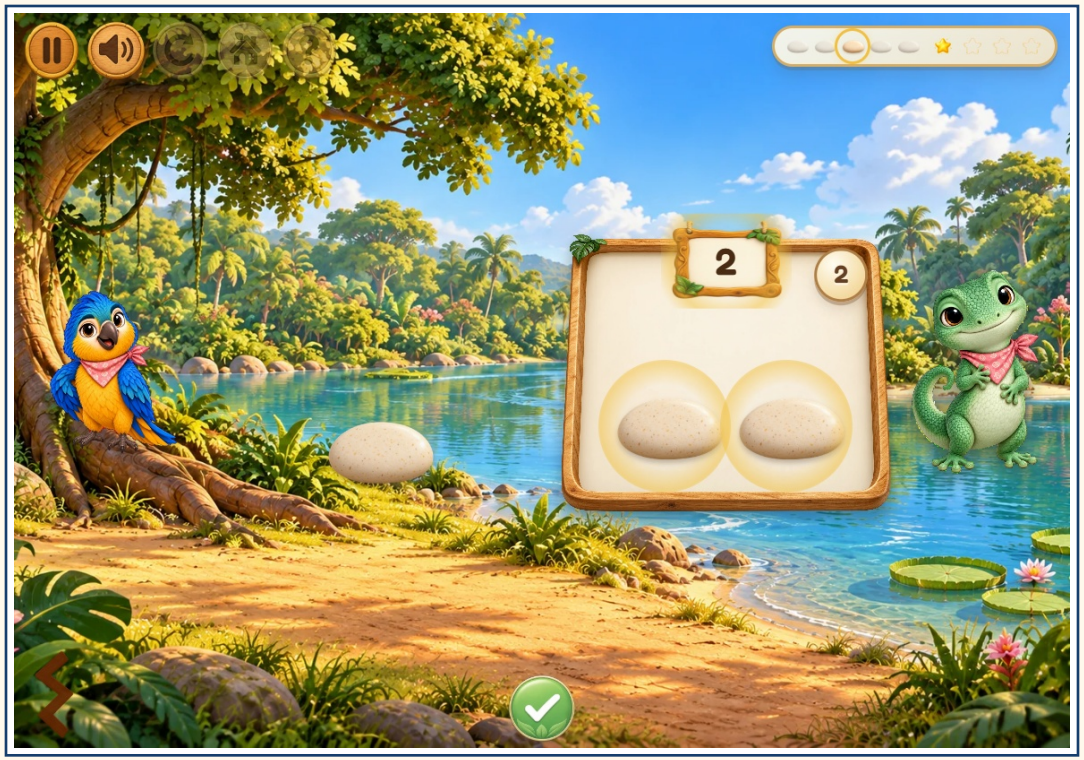

after: three stones

Look at the number. Tap stones to put them on the tray. Tap a tray stone to take it back.

The stock always holds one stone more than the sign, so one too many fits.

Tap the green check

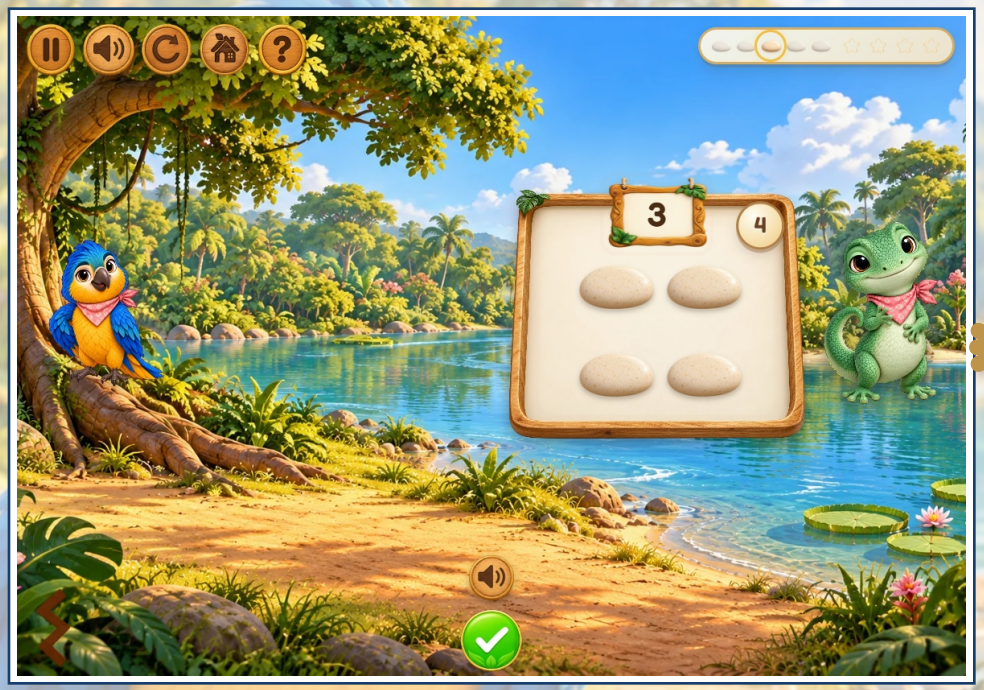

the tray is checked, then a star is earned

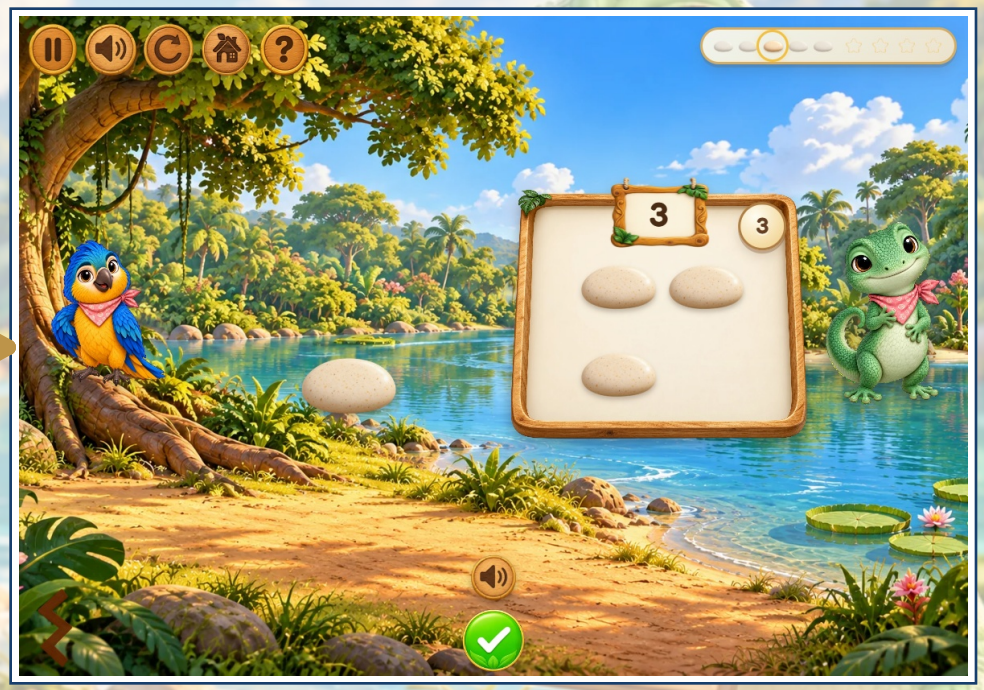

When you are ready, tap the green check. It checks your collection.

Nothing is checked until the child taps it.

Try a little change

one too many - the stones stay

one stone back out - ready again

Your stones stay. Add or take one away. Check again when you are ready.

A wrong check never removes a stone and never shows a red X.

Zero means none

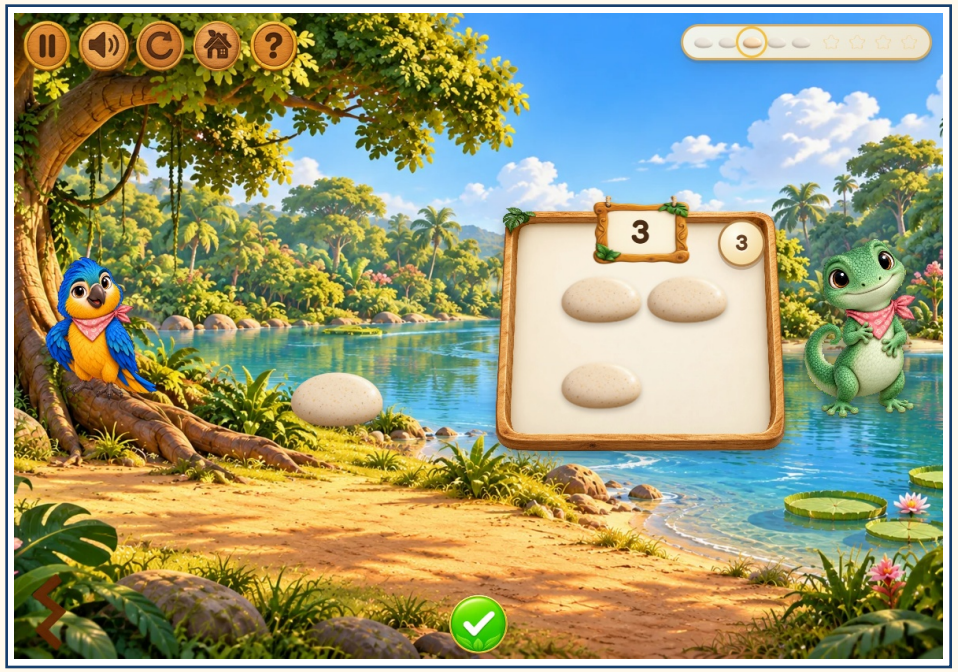

0

an empty tray

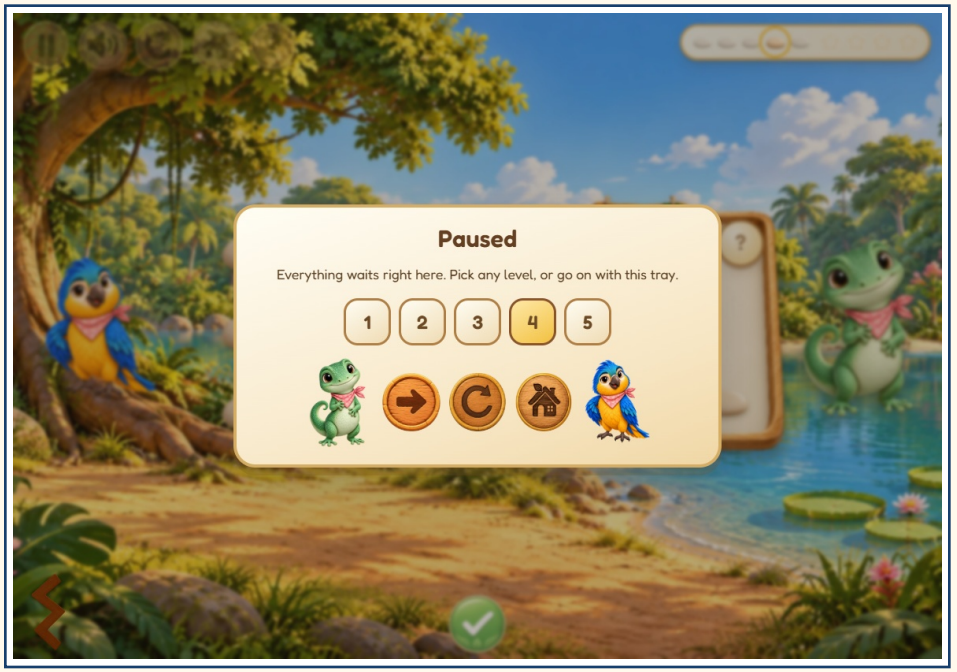

A sign with zero asks for an empty tray. Leave it empty, then tap the green check.

Zero is a real answer - the check stays available.

Help and a rest

the help counts the stones: three altogether

pause keeps your tray safe

Tap the tray's help button to hear the stones counted. The last number says how many altogether.

Pause keeps your tray safe.

Celebrate

Four stars finish one level.

Five levels finish the adventure. Hear the song, or play again.
