Rhino: Two Equal Shelves

A quick guide for parents and caregivers · Ages 5–7

The goal: share the whole delivery equally, with at most one aside.

Playful practice, not a test.

5 ways to help

1. Predict before moving.
2. Ask why one move changes two shelves.
3. Open one ten together.
4. Try the reverse order.
5. Invite a new delivery.

Your tiny play plan

10

minutes is plenty

No timer
Try again
No lost stars

You can watch and wait.

5 signs of the math

1. Predicts a fair share.
2. Explains the difference.
3. Checks both repair orders.
4. Accepts zero without a move.
5. Checks a new total again.

Try it away from the screen today

1. Put 11 safe, large objects between two trays.
2. Let your child share them equally and keep any extra visible.
3. Move one across. Ask what changed on BOTH trays.
