Rhino: Two Equal Shelves

A quick guide for parents and caregivers · Ages 5–7

The goal: share the whole delivery equally, with at most one aside.

Playful practice, not a test.

5 ways to help

1. Wait for a choice.
2. Ask what changed.
3. Keep the trial on view.
4. Compare both amounts.
5. Let the child repair it.

Your tiny play plan

5

minutes is plenty

No timer
Try again
No lost stars

You can watch and wait.

5 signs of the math

1. Uses the whole amount.
2. Compares both shelves.
3. Sees one less and one more.
4. Opens 10 without adding.
5. Keeps 0 or 1 aside.

Try it away from the screen today

1. Put 11 safe, large objects between two trays.
2. Let your child share them equally and keep any extra visible.
3. Move one across. Ask what changed on BOTH trays.
