

A quick guide for parents and caregivers

Lion: Zero Order

Ages 4-6

The goal: match the basket to Lion's requested amount, including zero.

Playful practice, not a test.

5 ways to help without giving the answer

1. **Look together.**
   Ask what Lion needs.
2. **Follow the rim.**
   Let a finger show inside the basket.
3. **Wait a moment.**
   Give time before offering help.
4. **Ask what changed.**
   Let your child move one fruit.
5. **Let them check.**
   An empty basket can be ready too.

Your tiny play plan

5 minutes is plenty

- **No timer**
- **You decide**
- **Try again**

Your job is not to solve it. Your job is to stay curious.

5 signs the math is happening

1. **Checks inside.**
   Looks within basket rim.
2. **Counts once.**
   Touches each fruit one time.
3. **Notices empty.**
   Treats no fruit as a real amount.
4. **Changes a choice.**
   Adds or removes a marula.
5. **Stops and checks.**
   Chooses when the basket is ready.

Try it away from the screen today

Set out a bowl.
Use three large objects.

→

Request an amount.
Include an empty bowl.

→

Let your child check.
Point, move, or say it.

No app	No ads, ever	Nothing collected from your child
