# Sloth: Ten and Some More

**TEN + EXTRAS** Look at the ten together and two extras. Follow the leaf in Sloth's hand to make thirteen.

1 **By the river**
Beside the river, warm and bright,
Sloth sets his leaf trays in the light.
He smiles at Aro: Come and see!
Let's make a leafy lunch for me.

2 **Ten and two**
Two rows of five are neatly tied.
Ten leaves stay put; they will not slide.
Two extra leaves sit down below.
Ten and two make twelve, you know.

3 **Count the extras**
Touch the two extras, one and two.
The ten stay together, waiting for you.
Sloth wants thirteen upon his tray.
One more is needed—here's the way.

4 **One more leaf**
Lift the leaf held in Sloth's hand.
Put it where the extras stand.
One, two, three! Now count just those.
The tied-up ten stay in two rows.

5 **Thirteen**
Ten and three make thirteen now.
Aro gives a happy bow.
Sloth taps OK; the trays are right.
Thirteen leaves—a leafy delight.

Keep ten together. Add one more.
Count the extras, then explore.

**ORI'S NUMBER THOUGHT**

**The ten can stay together. One more extra leaf makes the whole number one more, too.**

**Keep ten. Count extras. Check.**
