

A quick guide for parents and caregivers

Hippo: Tilt and Pack

Ages 5-7

The goal: Make the shown packs and loose pouches.

Playful practice, not a test.

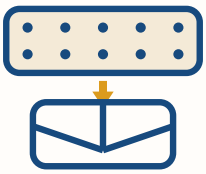

5 ways to help without giving the answer

1. **Notice the goal.**
   "What do you see in the goal?"
2. **Pause and predict.**
   "Where will the next pouch go?"
3. **Watch a full tray.**
   "What changes when it reaches ten?"
4. **Make room to revise.**
   "What could you undo or unpack?"
5. **Let your child check.**
   "Does your model match the goal?"

Your tiny play plan

5 minutes

is plenty

- No timer
- Undo
- Try again

Watch, wait, and listen. A gesture can show an idea.

5 signs the math is happening

1. **Tracks one at a time.**
   Watches each pouch move.
2. **Notices a ten.**
   Sees ten pouches become one pack.
3. **Keeps the total.**
   Counts a pack as ten pouches.
4. **Changes the grouping.**
   Opens one pack into ten loose.
5. **Checks both parts.**
   Compares packs and loose with the goal.

Try it away from the screen today

Make 12.
Lay out 12 paper squares. →

Pack ten.
Put ten in an envelope. →

Open the envelope.
Still 12 squares?
