Ten Together

Rhino: Pass the Ten Along · wondermaths.app

COUNT · PACK · CHECK

Join Rhino at the packing table. Point to the counters as you say the rhyme.

1

Beside the lake, beneath the tree,
Rhino brings a tray to me.
Ten small counters, smooth and bright,
Wait to travel home tonight.

2

Touch each counter, one by one;
Keep on counting till we're done.
Five above and five below:
Ten are ready now to go.

3

Fold the ribbon round the tray.
Did a counter go away?
One full pack is what we see;
Ten inside, as there should be.

4

Slip the ribbon off the tray.
Spread the counters out to play.
Count each one and then you'll see:
Ten, just like there used to be.

5

Ten full ten-packs, side by side,
Make one hundred packed inside.
Wrap or open, check and see:
Same amount as used to be.

Open hands, then bring them near—
Ten together, all still here.

Elephant's thought
Packing changes the groups. It does not add or take away counters.
